

9/29 [Reading](#) and Review Assignment

1. Using my answer key from “Quiz on the 9/19 Class Session,” under which of the social sciences does this piece best fall under? (Yes, it could fall under different ones but I’m looking for the best fit.)
2. What *change* in social norms and customs is the subject of this article?
3. What *impact* (or, if you prefer, effect) is this change having on individuals financially?
4. What underlying causes of this impact are briefly explored?
5. Which statistic indicates individual avoidance of the financial impact of choices they have made in the past?

Review your [classmate's notes](#).

1. Ideally, social scientists want two types of groups to study in their investigations and experiments. What are these two groups?
2. What is the difference between a “glass ceiling” and a “glass cliff”?
