

**10/22 APP (Academic and Personal Plan) Assignment. With the majors fair next week, it's a good time to be doing this.**

### **Educational Goals/Plans (Part 3 of APP)**

Use this as a worksheet to answer all questions. Do NOT leave out the questions in your uploaded responses. Files must be MS Word. Remember, you have the whole [MS Office suite](#) here free of charge and you can still by a downloadable version for only \$35 from IT (call x1110).

Browse the [2014-2015 Academic Catalog](#) in answering the following. A minimum of one sentence each:

1. What major(s) are you or might you be interested in?
2. What minor(s) are you or might you be interested in?
3. What off-campus learning programs/experiences are you or might you be interested in?

For each question, provide an affirmative response. In other words, "none" or "nothing" is not an option. Also, provide the page number for all the programs mentioned in each question. If you are enrolled in a major, even if you are satisfied with that choice, then, at a minimum, state that for the "major" question. However, please keep in mind that you are only freshmen. You certainly have the prerogative to change your mind about the major in which you are currently enrolled.

While you will likely enroll in five courses next semester, use "Browse Courses" on CampusWeb to find *seven courses* offered during Spring 2015 (One the drop-down menu, select "Rindge 2014/2015 Spring Semester.") that will properly fulfill requirements in majors/minors in which you are interested and in General and Liberal Education (GLE). For GLE, the most important pages of the catalog are 119 (towards the bottom, "Knowledge and Understanding") and 124-126.

The seven courses must be different (not two sections of the same course). List the course number, section, title and time offered. For example, one of your seven entries might read as follows: PA101.01 Introduction to Philosophy TuTh 10:50-12:05. If you are in GLE110 FYC I, then you must enroll in GLE120 FYCII. If you are in GS002 Writing Skills, then you must enroll in GLE110 FYC I. If you are in a science course, then you must enroll in the second segment of that science.
